Health and Beauty

The Nervous Modern Child

If this restless age does not soon come to an end, the world will be crowded with physical and mental wrecks.

Children were formerly kept comparatively quiet during infancy and childhood. They were also put to bed early at night. During the day they played with a few simple toys or romped in the gardens or under the trees.

Today, their nurseries are fitted up with every kind of contraption intended to amuse and interest them. Ambitious mothers try to teach them to fit maps and puzzles together as a very tender age. As soon as they begin to toddle, they play in the streets where life is a constant source of danger.

Poor little things dart back and forth on treacherous skates, and scooters, escaping automobiles, looking and listening at every turn for the juggernauts of death that strike so swiftly, maiming or killing. They are tense and on the quivive every moment, for they cannot romp, skate and play where deadly machines dart back and forth without realizing that at any moment they may be crushed under a truck, automobile or motorcycle.

When they go to school, the work is of necessity under our public school system, so arranged that a certain amount must be covered in a given time. They are still further stimulated by the offering of various awards or distinction if they attain certain standards.

The result is that some children easily reach the coveted goal while others who may have tried equally as hard and failed, feel bitter and keen disappointment which is further aggravated into resentment against the teacher who is in no way to blame.

If you enter a moving picture theatre where there is a show of a character which is most exciting, filled with fighting and dangerous hair-breath escapes, you will find the place with children of all ages, squealing, yelling, and otherwise giving vent to their excited pent-up emotions.

Do you wonder that nervousness is increasing among children? It is a disease that is growing by leaps and bounds. The nervous child unless placed in the proper environment and treated as he should be, will grow up into a neurasthenic, delinquent or psychoneurotic. He may untimately land in an insane asylum. The latter institutions are becoming so overcrowded that at the present rate of increase in their population, in a few years the sane, normal people that are left will be unable to bear the burden of the unfit.

GOLDEN GLEAMS

It is the great end of education to raise ourselves above the vulgar. —Richard Steele.

The great secret of education is to direct vanity to proper objects. — Adam Smith

Education makes a people easy to lead but difficult to drive; easy to govern, but impossible to enslave. —Henry Brougham.

The things taught in schools and colleges are not an education but the means of education. —R. W. Emerson.

A child's education should begin at least one hundred years before he was born. —O. W. Holmes.

Education is a process of driving a set of prejudices down your throat. —Martin H. Fischer.

GI'S MARRY

London.- United States servicemen are marrying British girls at the rate of 250 a month. There are now 85,000 American men, women and children in Britain.

Homemakers Items

Many window defects can be cured by proper curtaining, says Miss Ruth Jamison, house furnishings specialist at V. P. I.

For instance, on windows too high and narrow for the wall, extend the draperies out over the wall at each side of the window. Use a valance that comes down slightly below the window sash. Use sill-length curtains or draperies. Place a piece of furniture under the window.

The appearance of a window too short and wide can be improved by bringing the draperies slightly over the window at each side, and keeping them within a narrow space. Use a wide valance, carried up above the casing onto the wall. Let the draperies hang to the floor if possible; and if there is no radiator beneath the window, the curtains also can reach the floor. A vertical striped pattern will carry the eye upward, accenting the vertical dimension.

A favorite placement of windows in recent years is three windows in a series. Curtain them as a unit. If tie-back curtains are used, place them only at the end windows, or if the criss-cross curtain is used, bring it across the entire unit of three windows. Draperies and valance, if used, should also enclose the entire unit.

If a dormer window does not completely occupy the horrizontal space of the dormer, a drapery can be used to fill the space from window to enclosing wall at each side; but if the window completely fills the dormer from wall to wall, abandon the idea of using drapery. Choose a simple curtain arrangement. A dormer window is inset and its light is partly cut off from the room. To keep it lightly clothed.

Straight-hang curtains, hung in a bay than tie-backs. They can be tie-back, if preferred. The use of valance or cornice is required, but if one is used, extend it across the full bay, rather than around the corners down, and hang the valance to frame the bay itself.

It takes plenty of "know-how" to remove all the dirt and soil from your suit without damaging the material. We know how! Send your suits to us for thorough reNEWal!

Anything less is an old-fashioned truck!

Chevrolet Truck Work Styling is well illustrated in these four models ranging from the low Cab Forward and Cameo Carrier at left to the pickup and tractor-trailer unit at right.

New Chevrolet
Task-Force *Trucks*

They're the most modern trucks on the road. If you don't get all the advantages they offer, you stand to lose money on the job today . . . and again at trade-in-time!

It stands to reason, when you think about it, that the most *modern* trucks are the trucks that'll save you the most. They're the trucks that'll move your loads most efficiently and quickly. They're the trucks that offer the most comfort and convenience for the driver so that *his* efficiency goes up, too. They're the trucks that have the most modern and efficient engines—and you know what that means in terms of lower ton-mile costs!

Shortest stroke V8's . . . most advanced sixes

In most new Chevrolet truck models, you have your choice of V8* or 6. Chevrolet's new truck V8's have the shortest stroke of *any* V8 in *any* leading truck! That means less friction and wear per mile. And *all* Chevrolet truck engines have a modern 12-volt electrical system for quicker starting, better ignition, and a greater electrical reserve.

The truck driver's "dream cab"

That's the closest we can come to describing the new Flite-Ride DeLuxe cab. What truck driver wouldn't go for features like these: panoramic windshield for wider, safe vision; concealed Safety Step that stays clear of snow, mud and ice; High-Level ventilation that provides a more constant supply of outside air in all kinds of weather.

Most modern truck styling

We call it Work Styling—and you get it only in new Chevrolet Task-Force trucks! Two fresh, functional styling treatments are offered—one for light- and medium-duty models, another for heavy-duty models.

Most modern features throughout

Advanced suspensions, more rigid, ladder-type frames! Tubeless tires standard on ½-ton models! Come in and see *all* the ways you're way ahead with new Chevrolet trucks!

*V8 standard in L-C-F models, an extra-cost option in all others except Forward Control models.

CHEVROLET *Year after year, America's best selling truck!*

FARM NEWS

By Jim Smith
County Agent

Sudan Grass

Some farmers in Appomattox have seeded Sudan grass for supplementary grazing for the fall season approaches, they would like to warn those who have planted it to graze it down after frost as Sudan grass and sorghums have a high percentage of prussic acid after frost. If you do not graze Sudan or sorghum after frost has fallen, cut the Sudan grass is as soon as it is 15 inches tall when frost may be cut immediately for silage.

Care of Bees

Fall of the year is one of the best times to pay particular attention to bees. There are several things to consider doing, such as to unite weak colonies with other ones or provide new queens for all colonies with an abundance of bees but an old queen, and feed 25 quarts of sugar to one of the colonies not weighing 60 pounds. And, of course, reasonable assurances so that you can protect and cold winter winds do not get into the hive. A way of doing this, too, is to provide a windbreak of some type or another, such as stacked behind the hives and start considering its use on make an excellent temporary windbreak.

These practices will insure a higher yield of honey the following year.

Hybrid Grain Sorghums

A new hybrid seed that will be on the market next year in limited quantities for growers is hybrid grain sorghum. In the next five years, it is expected that more than ten million acres now annually planted in open-pollinated varieties of grain sorghums may be planted to the new superior hybrids. Experimental work shows that these hybrids will yield 20 to 40% over the open-pollinated kinds. This is a gain at least equal to the gain that farmers obtain from hybrid corn.

Some characteristics of the new hybrids are: dwarfed stalk, making the plant easier to harvest and handle and less of a drain on plant food and water; straightening up of the goosenecked head, and also a handling advantage; brought out varieties resistant to rootrot; and, very important, they cut down on the time of maturing.

Those farmers in Appomattox County who do not plant grain sorghum for poultry and swine feed will be interested in following the work done with the hybrid varieties and considering its use on their farms another year with this increase in yield that will be available.

Lynchburg Feeder Calf Sale

On Thursday, Sept. 29, the annual feeder calf sale will be held at the Lynchburg Livestock Market. Since many of the farmers in Appomattox County are interested in beef cattle production, they will be interested in visiting this sale and following the prices that the steers may bring. Many of the producers no doubt noted at the Orange Sale this past week that the calves sold for $24.75—the high pen, that is several cents average above the previous years. So it looks like the feeder calf prices will not be as low as last year and chances of some increase in prices.

Water Under Pressure Valuable On Farms

Here's a question for you! What is your most valuable use of electricity in the home or on the farm—the one that means the most to you? Some will answer—electric lights. Others will say the home food freezer, the water heater, the milking machine, and a dozen other uses of electricity. But many of you will agree that the electric pump tops them all—that it saves more labor and provides more conveniences than any other use of electricity on the farm. If it came down to a choice of one or the other, many rural folks would take their electric pump in preference to electric lights. That is how they feel about the value of water under pressure.

Then you may say—"well, doesn't just about everybody have a pressure water system?" Unfortunately, the answer is no. Here in Appomattox County, 98 per cent of our farms have electricity but only 28 per cent of them have water under pressure. In fact, we have about 682 farms in this county which do have electricity but which don't have water under pressure. The folks on these 682 farms are still pumping and carrying water by hand.

If your farm is one of these 682 have you ever stopped to figure how much time your family is spending pumping and carrying water? If not, check the time it takes to get water for a single day. Then multiply that figure by the number of days in the year. The result will amaze you. Let's assume you find that your family is spending 500 hours per year to pump and carry water. How much would that labor amount to in terms of productive farm work? Well, that is enough labor to care for 10 steers and 100 laying hens for an entire year—and we can throw in as a bonus labor to grow and harvest 10 acres of hay.

Aside from saving labor, water under pressure has another advantage,too. Think of such conveniences as a kitchen sink, a bathroom, and a modern laundry. In fact, you cannot have a modern home without first getting your water supply under pressure. And don't forget that health conditions are much better.

Now let's look again at Farm production. Not only can you have hours of labor spent getting water by hand but you can have more water where you need it. And that will mean more efficient production. For example, plenty of water for poultry and livestock can mean more eggs, more milk and faster gains for hogs and beef cattle. And if you have a good source of water, your automatic electric pump will supply enough water to irrigate the farm garden. Garden watering can mean more vegetables and vegetables of better quality.

When you add up all the benefits it is hard to figure how you can afford to be without water under pressure.

FOR LOW-COST WEED CONTROL
prepare your tobacco plant bed with
CYANAMID
It's Easy as A-B-C—

A. Prepare the soil.

B. Apply CYANAMID at recommended rate.

C. In the spring, rake, fertilize and seed as usual.

ADVANTAGES OF AERO® CYANAMID FOR TOBACCO BED WEED CONTROL
1. Eliminates costly, back-breaking hand weeding.
2. Supplies long-lasting nitrogen.
3. Produces stronger, healthier plants that grow off faster in the field.

REMEMBER—CYANAMID is the easiest, lowest-cost way to control weeds in your tobacco plant beds. See your dealer and place your order today.

Berwell Building, Knoxville, Tenn.

Hixburg

Hixburg, Sept. 26.- Mr. Edward Woolridge has returned to the Medical College of Virginia, where he is a junior in the class of Dentistry.

Kinckle Martin was taken to the Lynchburg General Hospital last Wednesday night, to be treated after being kicked on the leg by a cow. His condition is much improved..

Mr. and Mrs. Hans van Ness Allen, of Tulsa are expected at his river home the first of October.

Mr. and Mrs. Mart Anderson and Miss Rena Parks, of Chilhowie were the guests of Mr. and Mrs. Agee Glover last week.

Pfc. Martin Glover, mechanical engineer, is now stationed on Bathin Island near Canada.

Mr. and Mrs. Charles Williams spent the week-end with Mr. and Mrs. Watkins McPhillips in Richmond. Mrs. McPhillips has accepted a secretarial position with a Richmond insurance company.

Mr. Henry Covington plans to attend the Richmond Fair this week Earl Covington, a 4-H member, won a prize on his pig entry at the Farmville fair.

GUN KILLS SISTER, 8

Oak Grove, La.- Donald Dupree, 11, left the house to join his family in the cotton field when he suddenly remembered he had left a 22-calibre rifle within easy reach of an 8-year old sister, Nona. He ran back to put the weapon away, and stumbled over a chair. The gun discharged and his sister fell dead with a bullet in her head. The death was ruled accidental.

Around Your Home

by Frances Dell

A new device for home use is the fly-charmer. It is designed for use in any room of the house or outdoors. It is a small red and white plastic dispenser with a pylon arrangement rising out a flower pot shaped vase.

Filling the dispenser is a lethal chemical solution (harmless to humans) that lures and kills the common house-fly.

For romantic evenings at home, the pink-colored light bulb is just the thing. It is said that wrinkles fade and a "bloom of youth" appears.

This in itself would be enough to sell most of us, but there is more. The new soft light reduces stark shadows throughout the house, giving an overall rosy effect, blending decor colors more closely together.

The basic distinguishing feature of the bulb is a special coating sealed into the light which serves as a diffuser and a filter.

There is a new automatic ruffle iron. The iron is a rounded heated ironing surface over which materials can be pressed and smoothed by simple hand action. It is approved by Underwriters' Laboratories and will help solve almost any ironing problem.

COLLECTS STAMPS 18 YEARS

Norfolk, Neb. For the last eighteen years, Marvin Jones has been collecting stamps. At the last count, Jones had more than 50,000 stamps in his bound albums. Among these are 25 one-cent Benjamin Franklin stamps issued many decades ago.

Put Your Home In The Right Light... For Better Seeing...Better Decorating!

Modern lighting is the perfect backdrop for modern, family living. And when you take full advantage of today's lighting achievements, you can give every room in your home that decorator's touch!

Light conditioning actually points up all the fine features in any room. It not only lets you see better, but makes better use of every inch of space. Light conditioning visually pushes back the walls, dramatizes furnishings, creates moods, opens up small rooms and establishes conversational or play areas in larger ones.

Vepco's Home Service Representatives will be glad to assist you in planning modern lighting for your home. Or see your electrical dealer for advance-design fixtures and lamps, brackets and recessed lighting units. Today! Find out how to give your home that modern, light touch!
